

HOW WE GET THINGS DONE: LIST OF NEBRASKA TAXPAYERS FOR FREEDOM PROJECTS

PRESIDENT WATCH: This project commits to opposing the radical Biden Regime economic and social agenda, with its high taxes, wasteful spending, and burdensome regulations imposed on individuals and businesses.

CONGRESS WATCH: Our project instructs members how to monitor votes and lobby their Capitol Hill representatives on crucial tax, spending, and regulation bills and resolutions. NTF issues annual voting records.

LEGISLATURE WATCH: NTF believes that the citizens of Nebraska have a right to know how their state legislators vote on important legislative issues that impact the fiscal health of taxpayers, government intervention in private life and business, and law and order. This project affords Nebraskans a broad and deep analysis of how their state senators perform. Members learn to lobby and monitor voting patterns of state senators. NTF issues an annual voting record.

COUNTY WATCH: This project instructs NTF members how to track the tax and spending behavior of Douglas County Commissioners in their annual budgets and other fiscal matters. We offer commissioners ideas and suggestions to rein in profligate spending on non-necessities and bloated union contracts. NTF issues an annual voting record.

CITY WATCH: This NTF project instructs members how to lobby and monitor Omaha city council members and the mayor to act in a fiscally conservative manner and implement taxpayer ideas to give citizens more efficient services under a leaner budget. NTF issues an annual voting record.

EDUCATION WATCH: We provide information and materials to members interested in increasing educational responsibility and choice. We believe that public schools must undergo fundamental administrative restructuring to make them more responsive and efficient in meeting the academic needs of children and more accountable for what students actually learn. NTF supports increased parental input and control and educational choice. We oppose Common Core curricula and Critical Race Theory.

UNIVERSITY WATCH: We provide information and materials to members interested in increasing fiscal and curricular educational responsibility in our state post-secondary institutions. We believe that the University system must undergo fundamental fiscal reform to make it more responsible and efficient in meeting the academic needs of students and more accountable to Nebraska taxpayers and the Legislature. NTF publishes an annual University regent voting record.

NATURAL RESOURCES WATCH: This project instructs our members how to lobby and monitor natural resource district board members across the state regarding the necessity to concentrate on flood control and erosion problems and stop the trend toward building unnecessary dams and other structures for recreational purposes, also a trend that favors private developers. NTF publishes an annual voting record.

TELECOMMUNICATIONS WATCH: This project promotes deregulation and free market competition in the telecommunications industry in NE. We stand vigilant against monopolistic trends, high taxes and fees, federal and state overregulation, and privacy invasion. We advocate advancing technology in telecommunications commerce.

CONSERVATIVE CONSUMERISM: In this project, NTF members compile a list of leftwing businesses and personalities to boycott and a list of conservative businesses and individuals to patronize and support. This project is in direct response to liberal boycotts of conservative commerce and personalities.

PROJECT IMMIGRATION: Our project educates and instructs members how to lobby and monitor their local, state, and federal elected officials to stem the tide of illegal immigration into Nebraska, initiate steps to deport illegal aliens, and therefore save taxpayer expenditures on education, welfare, medical services, law enforcement, and incarceration costs.

REMEMBER, WHEN TAXPAYERS SIT IDLE AND DO NOTHING, LIBERALS WIN! PLEASE VOLUNTEER FOR ONE OR MORE OF OUR NTF PROJECTS. Reply by email to: netaxpayers@gmail.com.
